Projects

Our Music | <https://github.com/chlucas324/music-suggestion> |
<https://tranquil-retreat-40972.herokuapp.com/>

- The application allows users to search for recommended songs and create playlists.
- I managed the GitHub repository, set up the Handlebars files, and updated the CSS. I worked with my project team to debug and research APIs.
- Tools/Languages: Bootstrap, Handlebars, JavaScript

TABS | <https://thomascerr.github.io/TABS-Brewery-Weather-Application/>

- The application allows users to search for breweries and the weather forecast based on location input.
- I set up the HTML and updated the CSS using Materialize. I worked with my team to research APIs to use and helped with the JavaScript used to display the results.
- Tools/Languages: Materialize, HTML5, JavaScript
